ABOUT THE GAME

Over 1000 years ago, a war broke out between the people of Earth and the worshipped settlers from planet Signus. The surviving Signians only option was to flee back to their home planet, using the same portal they once came through. Since then, the people of Signus have rebuilt their culture into a utopian society where everyone lives in peace and harmony. Now back on Earth, a group of explorers have discovered the lost city of Atlantis, where they found a mysterious marble doorframe that, unbeknown to them, once was the portal between the two worlds. As they attempt to decipher the engravings on the marble, the Signians can feel the connection between the two planets open again. Fearing another war, the three leaders of Signus, Irriax, Armax and Mynax, go on a journey to find the missing enchanted tablets that can break the link between the two planets forever.

Located 301 light-years away from Earth, explore the beauty of planet Signus, the original home of what ancient Greek civilization believed to be their gods.
